

# 1360 Security escutcheon - steel

Door fittings

Security escutcheons without cylinder cover

Round

IKON provides a broad selection of security fittings and escutcheons, with or without cylinder covers. The wide range of IKON fittings is suitable for house and apartment doors, interior and exterior doors and doors made of all conventional materials. It encompasses a variety of handle fittings, a broad range of anodised finishes and colours and a quality spectrum ranging from solid aluminium fittings to premium security steel fittings. Solid steel with drilling protection and internal screw fittings with high tensile resistance form a practically impervious shield for locking cylinders.

#### Area of Application

IKON security escutcheons with profile locking cylinder cut-out and without a cylinder cover ensure that locking cylinders are securely mounted on house and apartment entrance doors. They effectively resist intrusion attempts involving break-in or extraction of the cylinder. A locking cylinder with drilling protection should be utilised when employing escutcheons without a cylinder cover.
