Mechanical locking cylinders

Dummy cylinder

Dummy cylinder with colour clips

Locking cylinders form the core element of secure locking systems and represent IKON's core competency. The product range meets challenging security requirements with sophisticated solutions. High-quality IKON locking cylinders provide high protection against intruders. Standard equipment in this respect includes anti-drilling devices, security cards and panic functions. Patented profiles are a direct result of decades of experience gained in precision engineering and are effectively equipped against even the latest intrusion or burglary techniques. These features include innovative VECTOR profiles and the IKON reversible key profile WSW-W10.

Area of Application

Dummy cylinders are frequently used in areas without security requirements. Dummy cylinders are mainly used to seal profile cylinder holes and do not have any locking function.
