

1534,KNF=9 Knob cylinder

With red/green indicator and emergency opening with Allen key 5 A/F

Mechanical locking cylinders

Special knob cylinder

Locking cylinders form the core element of secure locking systems and represent IKON's core competency. The product range meets challenging security requirements with sophisticated solutions. High-quality IKON locking cylinders provide high protection against intruders. Standard equipment in this respect includes anti-drilling devices, security cards and panic functions. Patented profiles are a direct result of decades of experience gained in precision engineering and are effectively equipped against even the latest intrusion or burglary techniques. These features include innovative VECTOR profiles and the IKON reversible key profile WSW-W10.

Area of Application

Universal knob cylinders are frequently used in sanitary rooms. The inner rotary knob is used for simple locking of the door, therefore a key is not required for the inside. The locked status is indicated with coloured markings (red/green) on the outside. For safety reasons the cylinder can be actuated simply with an Allen key from the outside.
