

1552 Half cylinder

Mechanical locking cylinders

Half cylinder with universal locking

With universal locking - for all systems

Locking cylinders form the core element of secure locking systems and represent IKON's core competency. The product range meets challenging security requirements with sophisticated solutions. High-quality IKON locking cylinders provide high protection against intruders. Standard equipment in this respect includes anti-drilling devices, security cards and panic functions. Patented profiles are a direct result of decades of experience gained in precision engineering and are effectively equipped against even the latest intrusion or burglary techniques. These features include innovative VECTOR profiles and the IKON reversible key profile WSW-W10.

Area of Application

Half cylinders with universal locking on both sides are generally used for other doors with a temporary or very low security requirement. IKON half cylinders are available in different lengths to meet the needs and requirements of every installation situation.
