

# 1M44,AUS=233 Handle rose oval design

Door fittings

Escutcheons

The IKON construction and internal door fittings range covers a broad spectrum of applications and utilisation options. The range encompasses fittings, backplates, roses, escutcheons, handles and knobs for doors and windows. IKON also provides a large selection of premium-quality fittings for metal and UPVC frame doors. For example, the shortened 290/30 metal handle with retraction spring on a rose with concealed screws. The 474 handle on a rose is distinguished by its shortened U-shape, which provides the hand with particularly good hold.

## Area of Application

IKON aluminium escutcheons can be used for a variety of applications. Round, oval and squared escutcheons are utilised, either as dummy versions prepared for profile cylinders or handle roses accepting the door handle.
