

# 2186 Universal locking lever cylinder - System MK5

Mechanical locking cylinders

Locking lever cylinder

21mm diameter, laterally flattened to 17.6mm

Locking cylinders form the core element of secure locking systems and represent IKON's core competency. The product range meets challenging security requirements with sophisticated solutions. High-quality IKON locking cylinders provide high protection against intruders. Standard equipment in this respect includes anti-drilling devices, security cards and panic functions. Patented profiles are a direct result of decades of experience gained in precision engineering and are effectively equipped against even the latest intrusion or burglary techniques. These features include innovative VECTOR profiles and the IKON reversible key profile WSW-W10.

## Area of Application

Locking lever cylinders are mainly used for letterboxes, vending machines, control cabinets, haunch flaps, wardrobe lockers or security lockers. IKON supplies locking lever variants to suit different areas of application.
