

# 5512 Switching cylinder - system TK5

Mechanical locking cylinders

Switching cylinder

30mm diameter, laterally flattened to  
22mm

Locking cylinders form the core element of secure locking systems and represent IKON's core competency. The product range meets challenging security requirements with sophisticated solutions. High-quality IKON locking cylinders provide high protection against intruders. Standard equipment in this respect includes anti-drilling devices, security cards and panic functions. Patented profiles are a direct result of decades of experience gained in precision engineering and are effectively equipped against even the latest intrusion or burglary techniques. These features include innovative VECTOR profiles and the IKON reversible key profile WSW-W10.

## Area of Application

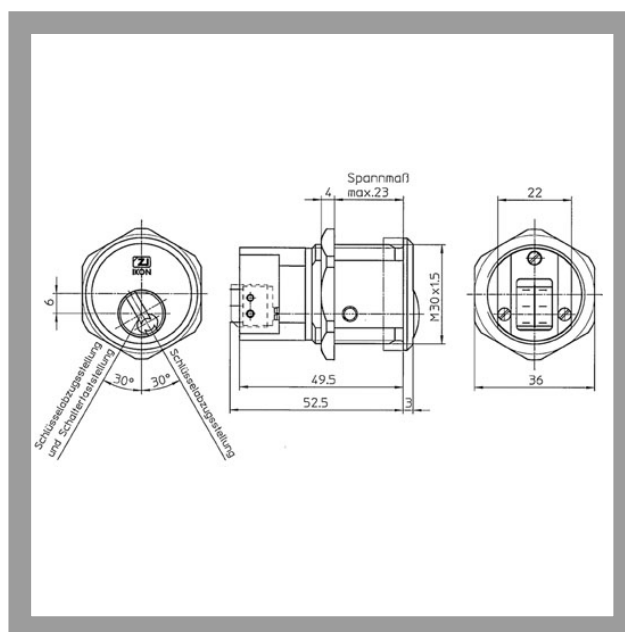

Switching cylinders are mainly used for electrical equipment, switching systems or lift controls. IKON supplies different switch cylinder versions to suit various areas of application.

# 5512 Switching cylinder - system TK5

30mm diameter, laterally flattened to 22mm

## Product description

- 5 pin tumblers
- Brass cylinder
- Standard finish, satin nickel-plated (OF=MV)
- Other surfaces: brass, mat brushed (OF=MG), polished brass (OF=MP)
- Switching cylinder with 1 scanning and 1 key withdrawal position
- Two microswitches F477 (Burgess) (VAC 250 V/ resistive load 5A, VAC 250 V/ inductive load 0.5 A)
- Key rotation 60°
- A rotation actuates switching device (e.g. underground car parks, etc.).
- Key with round metal head
- Spherical cylinder core head with reinforced key guide

## Scope of delivery

- 1 switching cylinder
- 2 nickel silver keys
