

8173 Metal grille locking device

Additional window locking devices

Roller shutter and metal grille locking devices

Additional locking device for metal grilles, especially basement shafts

The Model 8173 with escape route function offers the option of unlocking the locking device from below using a handle that is inaccessible from the outside. The IKON metal grille security device thus provides double security: Protection against unauthorised opening on the outside while the grille can be opened rapidly from the inside in an emergency to create an escape route (e.g. in case of fire). The advantages of this technology are also evident in the absence of an emergency: The escape route function can be re-established at any time after opening for example or to reach an oil filling spout. The user-friendly unlocking option is also an advantage when cleaning the basement shaft.

Area of Application

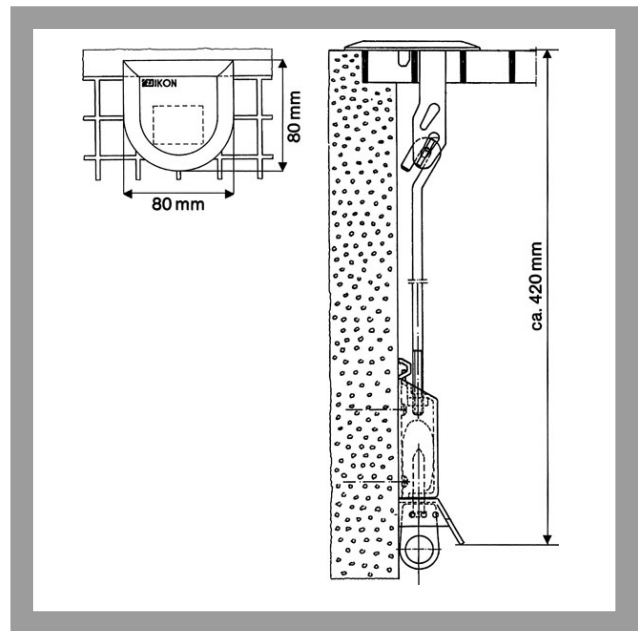

The fully-developed system for securing metal grilles of different heights. Secures windows as a precautionary measure. Flat shape (thus not a tripping hazard). The cover plate fastened in four positions at the top of the grille, the sturdy, wide tension rod and the dual screw connection deep in the well combine to provide an integrated, burglar-proof system. Security plates ensure the screw joints are inaccessible.

8173 Metal grille locking device

Additional locking device for metal grilles, especially basement shafts

Product description

- Model 8173 with integrated escape route function
- Unauthorised removal of metal grilles is effectively prevented
- With panic function for rapid and simple release of additional locking device from inside
- Zinc-coated complete steel design
- Cover plate encompasses 4 fields plus masonry = minimum tampering points
- Suitable for all conventional metal grilles
- Rapid mounting: only 2 dowel holes required in shaft
- Also suitable for UPVC basement shafts
- Intrusion resistant: security provided by 4 fields remains effective, even if the cover plate is removed
- Adjustable to height of grille in 2 stages to max. 45 mm
- Secure locking without gaps, due to precise adjustment of locking rod

Scope of delivery

- 2 metal grille locking devices with fixing material
