How many important documents, personal possessions and valuables, files, plans, design drawings, instruments, medicaments, etc. are kept in drawers, compartments or safes and cabinets? All these items, which sometimes cannot be valued accurately and may frequently be irreplaceable, or possibly dangerous for people, require a secure lock. However, this lock must fit into the framework of the piece of furniture involved. IKON provides a small but effective range of bolt locks for doors and drawers and espagnolette locks for offices, households and functional furniture.

Area of Application

IKON furniture locks are best used in conjunction with suitable IKON locking cylinders and their accessories. The use of IKON locking cylinders in the furniture lock also enables the integration of different pieces of furniture (e.g. desks, filing cabinets, drawing cabinets, etc.) in a locking system.
