

9M26 Lifting door safety mechanism 160

Additional door locks and security devices

Lifting door and lifting sliding door handles

With push cylinder and two keys

IKON provides a broad range of additional safety mechanisms for windows and balcony doors. The IKON lifting door safety mechanism also provides effective protection against intruders when utilised on lifting doors.

Area of Application

The IKON lifting door safety mechanism is pushed from above by the lifting operating lever arm and surrounds this completely like a bell. Lateral force can no longer be applied to push it away. Its function is thus effectively blocked. The screwed joint is concealed when the door is closed.

9M26 Lifting door safety mechanism 160

With push cylinder and two keys

Product description

- Complicates unauthorised opening of the door from inside and outside - also suitable as a child safety mechanism for indoors
- Visual locking display above push cylinder
- The blocking of the control lever secures the balcony and terrace doors
- Pushed down from the top over the control lever of the lifting door completely enfolding it - sideways opening is then obstructed
- Mounting through pivoting housing even with a minimum space availability
- All IKON additional locking devices with push cylinder can optionally be keyed alike
- Standard finish anodised silver (FB=F1)
- Other finishes anodised nickel silver (FB=F2), anodised gold (FB=F3), powder coated Meta Color 1003 (FB=MC), powder coated white RAL 9016 (FB=WS)
- Material: aluminium
