

9M30,TEIL=707 AP Base plate for cross bar 9M29

Additional door locks and security devices

Cross bar and garage door locks

For outward-opening doors

IKON provides a wide range of accessories and spare parts. Please note that the overall quality of IKON products can only be guaranteed if suitable original parts are used.

Area of Application

This IKON cross bar is generally used on secondary entrance doors (e.g. basement doors) to supplement mortise locks, locking cylinders and security fittings. This IKON cross bar provides security across the entire door width, as the solid steel bolt secures the door on the left and right. The cross bar can be installed quickly and adapted to suit all conventional door widths.
