

# 9M68,AUS=LH50- 150 Padlock 50 with variable shackle

Padlocks and mobile locks

Padlocks

With complete removable shackle

A padlock enables you to protect valuables inside and outside a building. IKON provides optimum security - conveniently and safely. IKON padlocks can be employed flexibly and are ideal for securing valuables, even in remote locations. They are available for internal use and as corrosion protected versions for external use. IKON can supply a wide range of padlocks (e.g. as numerical combination locks or padlocks with variable shackle heights for different applications).

#### Area of Application

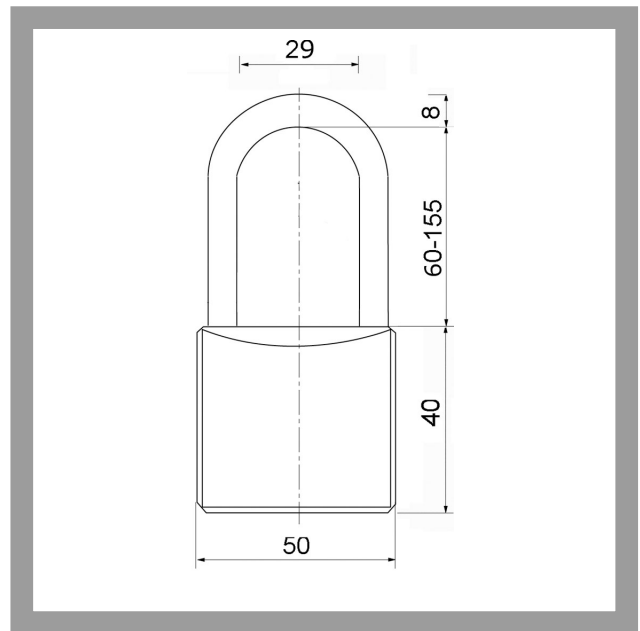

Different IKON padlock versions provide the best solution for every application. IKON padlocks are especially suitable for locking cellars and basements, stables and allotments, tool sheds and boat houses or wardrobes. Tool trolleys, building vehicles and trailers or oil tank and machine protection equipment is also ideally secured with IKON padlocks. This padlock can be flexibly employed, due to its variable shackle height.
