

PA01 Universal half cylinder - System P0

Mechanical locking cylinders

Half cylinder

Locking cylinders form the core element of secure locking systems and represent IKON's core competency. The product range meets challenging security requirements with sophisticated solutions. High-quality IKON locking cylinders provide high protection against intruders. Standard equipment in this respect includes anti-drilling devices, security cards and panic functions. Patented profiles are a direct result of decades of experience gained in precision engineering and are effectively equipped against even the latest intrusion or burglary techniques. These features include innovative VECTOR profiles and the IKON reversible key profile WSW-W10.

Area of Application

Half cylinders are frequently used where doors and gates are only locked on one side (e.g. garage doors, cellar doors and tool sheds). They are however also used in lifts, alarm systems and other auxiliary security systems (e.g. lockable window handles).

PA01 Universal half cylinder - System P0

Product description

- 5 pin tumblers
- Brass cylinder
- Standard finish, satin nickel-plated (OF=MV)
- Available for individual lockings and locking systems
- Available for individual locking with standard locking (AA=NML), without security card
- Key with square metal head
- Tapered cylinder core head with reinforced key guide

Scope of delivery

- 1 universal half cylinder
- 2 nickel silver keys

PA01 Universal half cylinder - System P0

Current profiles for individual locking

Profile (PR=)	Standard profile N1.
Profile version	70
With security card included	No
Drilling protection (AB=)	optional
Emergency device (GE=)	optional
Locking wave (SW=)	-
VdS class	-
RAL quality symbol	-
DIN class	-
Modular system (GBK=)	-
Additional lateral pins	-
Factory-keyed profile/Client profile	Factory-keyed profile
Key head shape	Square
