

S413 Steel security fitting with cylinder cover - handle/handle

Door fittings

Security fittings with cylinder cover

Long backplate for apartment doors

IKON provides a broad selection of security fittings and escutcheons, with or without cylinder covers. The wide range of IKON fittings is suitable for house and apartment doors, interior and exterior doors and doors made of all conventional materials. It encompasses a variety of handle fittings, a broad range of anodised finishes and colours and a quality spectrum ranging from solid aluminium fittings to premium security steel fittings. Solid steel with drilling protection and internal screw fittings with high tensile resistance form a practically impervious shield for locking cylinders.

Area of Application

IKON security fittings with profile locking cylinder cut-out and a cylinder cover ensure that mortise locks and locking cylinders are securely mounted on house and apartment entrance doors. They effectively resist intrusion attempts involving drilling, break-in and extraction of the cylinder.
