

# S464 Security escutcheon with cylinder cover

Additional door locks and security devices

Cross bar and garage door locks

For IKON Protector bar DRS

IKON provides a wide range of accessories and spare parts. Please note that the overall quality of IKON products can only be guaranteed if suitable original parts are used.

## Area of Application

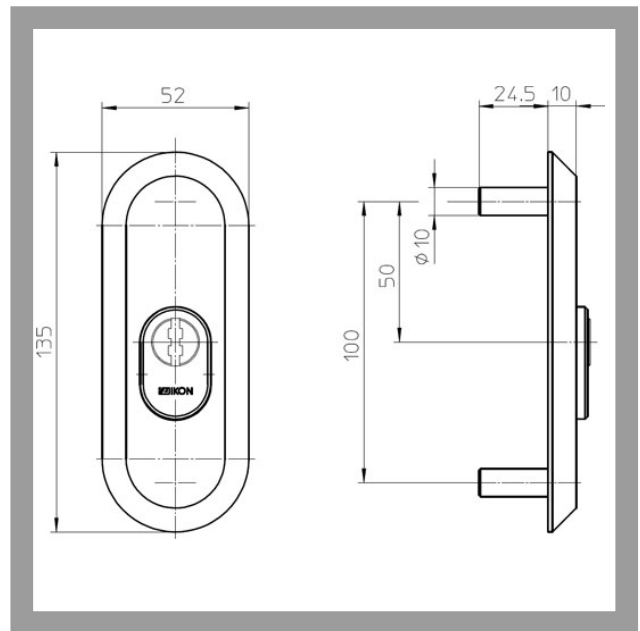

The IKON Protector DRS bar is generally used on apartment or main entrance doors in addition to mortise locks, locking cylinders and security fittings. This IKON Protector bar provides security across the entire door width. The Protector bar DRS can be installed quickly and adapted to suit all conventional door widths. Different door leaf widths are compensated for by an integrated adjusting mechanism. The IKON Protector bar DRS is prepared to accept profile locking cylinders, so that the same locking mechanism can be installed to the main door lock or in the rim dead lock.
