

SM14,AUS=PAAR Security escutcheon with cylinder cover for metal frame doors MRR

Door fittings

Security escutcheons with cylinder cover

Pair of escutcheons

IKON provides a broad selection of security fittings and escutcheons, with or without cylinder covers. The wide range of IKON fittings is suitable for house and apartment doors, interior and exterior doors and doors made of all conventional materials. It encompasses a variety of handle fittings, a broad range of anodised finishes and colours and a quality spectrum ranging from solid aluminium fittings to premium security steel fittings. Solid steel with drilling protection and internal screw fittings with high tensile resistance form a practically impervious shield for locking cylinders.

Area of Application

IKON security escutcheons provide effective protection against breaking off of locking cylinders. Extraction or drilling of the cylinder is thwarted by an additional cylinder cover. IKON provides a broad range for wooden, UPVC and metal frame doors.
