Door fittings

Special security fittings

Sandwich design cap fitting - for fire
protection doors

IKON provides a broad selection of security fittings and escutcheons, with or without cylinder covers. The wide range of IKON fittings is suitable for house and apartment doors, interior and exterior doors and doors made of all conventional materials. It encompasses a variety of handle fittings, a broad range of anodised finishes and colours and a quality spectrum ranging from solid aluminium fittings to premium security steel fittings. Solid steel with drilling protection and internal screw fittings with high tensile resistance form a practically impervious shield for locking cylinders.

Area of Application

These IKON security fittings are approved for use on fire doors conforming to DIN 18273 but not suitable for use on metal frame doors.
