

HB70

STANDARD RESOLUTION DAY/NIGHT BULLET CAMERA WITH INFRARED ILLUMINATORS

The Performance Series rounds out Honeywell's camera portfolio with a variety of indoor, outdoor and low light cameras that lets end users pick the perfect camera for virtually any installation. Ideal for a diverse range of applications, the Performance Series includes a wide range of high performing IR bullet cameras and mini-domes that are easy to install and even easier to use.

The HB70 IR bullet-style camera comes standard with IR illumination, making it perfect for 24/7 surveillance. When the ambient light drops below a user-defined threshold, the IR LEDs activate and the camera changes automatically from color to black and white, capturing perfect color pictures by day and clear black and white images at night.

The 4.3 mm lens offers a wide field of view to complement the 12 IR LEDs that can illuminate up to 45 feet, depending on scene reflectance. The 380 TVL sensor provides clean images in day and night conditions.

The HB70 camera installs easily and quickly. It comes standard with a two-conductor pigtail that connects to the barrel connector so there is no need to cut wires during installation. The mounting bracket installs quickly and securely with three screws on walls or ceilings, indoors or out.

Market Opportunities

The HB70 is a cost effective surveillance solution for applications that experience changing light conditions throughout the day and require extra illumination at night. The HB70 offers a simple yet solid design that provides optimum performance for both indoor and outdoor applications including lobbies, atriums, vestibules, gated entrances, foyers, loading docks and driveways.

Features

- Discreet, bullet-style camera with 12 IR LEDs
- Weatherproof housing with IP 65 rating
- 4.3 mm lens
- Standard resolution color: 380 TVL - 1/3" Sony Super HAD CCD
- IR LED visible range of 45 ft. (15m)
- Easy to install mounting bracket reduces installation time
- Two-conductor pigtail is standard for connection to barrel connector
- Equalization valve prevents vacuum effect caused by sudden changes in barometric pressure
