

System TK5 - Standard profile N2.

Mechanical locking cylinders

New profiles for individual lockings

Factory-keyed profile

Product description

- 5 spring-loaded pin tumblers = protection against unauthorised opening
- Paracentric key profile = unlocking security
- Optional drilling protection class 1 (AB=1) or 2 (AB=2)
- DIN class 70
- Double-sided locking option = emergency key function
- Key with round metal head

Tried and tested IKON profile in the traditional TK5 profile with 5 active spring-loaded pin tumblers. Profile N2 is a paracentric profile which offers reliable protection against forced entry and lock picking in conjunction with special pin combinations.
