Door fittings

Security fittings without cylinder cover

Sandwich design cap fitting

IKON provides a broad selection of security fittings and escutcheons, with or without cylinder covers. The wide range of IKON fittings is suitable for house and apartment doors, interior and exterior doors and doors made of all conventional materials. It encompasses a variety of handle fittings, a broad range of anodised finishes and colours and a quality spectrum ranging from solid aluminium fittings to premium security steel fittings. Solid steel with drilling protection and internal screw fittings with high tensile resistance form a practically impervious shield for locking cylinders.

## Area of Application

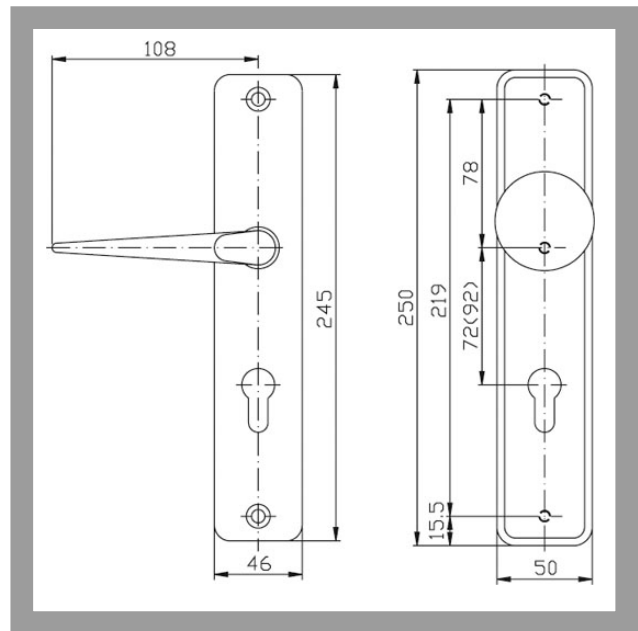

Security fittings provide secure mounting for mortise locks and locking cylinders in house and apartment doors and offer effective resistance against intrusion attempts, such as break-ins, levering open or drilling, while the cylinder cover effectively prevents cylinders extraction.
